

Canada:Ph.D. in Information Studies program

The Faculty of Information (the iSchool), at the University of Toronto is now accepting applications for the Ph.D. in Information Studies program, starting in September 2017.

Successful candidates will become members of the Database Management group (iDB) within the iSchool.

Students with an MSc or MI degree and a strong background in Computer Science, Computer Engineering or related fields are particularly encouraged to apply.

Prospective areas of research include but are not limited to:

- structure discovery in large datasets;
- text analytics;
- causality analysis;

Students will be funded for four years through a combination of fellowship and research assistance.

Funding information for the Faculty can be found here:
<http://www.ischool.utoronto.ca/phd-funding-summary>

In coming to the Faculty of Information (the iSchool), students will find a rich, diverse and research-intensive environment in which to conduct doctoral studies. More information about our program can be found at:

<http://www.ischool.utoronto.ca/phd>

and the Degree Requirements at:

<http://www.ischool.utoronto.ca/phd-requirements> .

Applicants must apply for the Doctorate in Information and in your statement of intent indicate an interest in working in the Data Management group (iDB) and the field of Data Analytics.

The deadline for full consideration for the program is January 15, 2017.

More information on the admissions process can be found at:
<http://www.ischool.utoronto.ca/phd-admissions>

For further information you can contact Dr. Periklis Andritsos:
